

MEMORIAL

Memorial for Dr. Seyed Taghi Nourbakhsh, a Great Orthopedic Surgeon and a Nice Colleague

By:

Mohamamd H. Dehghani Tafti, MD

AO Middle East Faculty, Isfahan, Iran

Dr. Seyed Taghi Noorbakhsh died in a tragic car accident on Nov 15th 2018, while on an official mission in Golestan Province in Iran.

There is a great emptiness left by Dr.Noorbakhsh's passing. He will be missed by his colleagues and thousands of his patients whom he helped during his career.

In addition to being a board member of Iranian Orthopedic Association (IOA), for consecutive terms & Chief of the Iran Social Security Organization since 2013, Dr.Noorbakhsh served as an AO Trauma Faculty member for several years. He was a great leader in his field. Besides his official roles throughout his career, Dr.Noorbakhsh served in many social positions, receiving numerous prestigious awards.

He was a valuable and highly respected member of our team here in ABJS Editorial Board and at Iranian Orthopedic Association. The effects of his loss are being felt already by those of us who had the honor and pleasure

of working with him.He was a fantastic individual who will be greatly missed everyone who knew him.

He spoke well who said that graves are the footprints of angels.

Good people pass away; the godly often die before their time. But no one seems to care or wonder why.

Life is a book in volumes three;

The past, the present, and the yet-to-be.

The past is written and laid away,

The present we're writing every day,

And the last and best of volumes three

is locked from sight - God keeps the key.

Say not, in grief, that he has gone

But give thanks that he was ours.

On behalf of our team in the journal and Iranian orthopedic community, we extend our condolences to the family and friends of him.
