A Study of Socio-Cultural Obstacles of Development with Emphasis on Particularism :A Case Study in Bandarabbas City

R. Rabbani*, N. Poorafkari*, M. Ketabi* and M. Raoofi**

*Sociology Department , the Universtiy of Isfahan

**Ph.D. student in Sociology.

Abstract

Development has difficult , different and many economical , social , cultural , psychological and political dimentions .For understanding of reasons and obstacles of development , all the mentioned options should be researched , but socio-cultural elements has fundamental role in development process.In this article we want to find :why in spite of enormous industrial, economical and commercial investing and several universities and high training institutions which has established in Hormozgan , this region doesnot have enough development and still classifies as a divested region?In this study we test Particularism that considered as one of the main socio-cultural obstacles of development in Bandarabbas city with modeling social-modernization theory of Parsons, Survey method, Likert-Scale, Semantic differencial and Projection. Based on the results , average of Particularism in Sample statistic is (2/89), that in separation : for natives citizens is (2/88), non-native is (2/98),women is (2/86), men is (2/93),Sunnites is (2/8) and Shiites is (2/95).

Key words:Development,Social modernization, Particularism , Social interaction and Socio-cultural obstacles.

$$no = \frac{z^2 p(1-p)}{d^2} = \frac{z^2 p (1 - p)}{(kp)^2} = \frac{z^2}{k^2} \times \frac{1-p}{p}$$
$$n = \frac{n_0}{1 + \frac{n_0}{N}}$$
$$no = \frac{1.96^2 0.5(1-0.5)}{0.055^2} = \frac{1.96^2 0.5(1-0.5)}{(0.11 \times 0.5)^2} = \frac{1.96^2}{0.11^2} \times \frac{1-0.5}{0.5} = 317$$
$$n = \frac{317}{1 + \frac{317}{296+82}} = 317$$
