Analysis of Procedure of Changes in the Indexes of Development in the Province of Chaharmahal va Bakhtiari

M. Taghvaie* and A. Ramezani**

***Department of Geography, University of Isfahan**

**** M. A. Student of Rural Planning**

Abstract

Better understanding and recognizing the amount of development of provinces of the country and comparing them to each other not only causes a particular attention to be paid to them economically, but also causes their weaknesses, strengths, potentialities and deficiencies to be

recognized. This, in turn, ultimately causes the regional and district planning to be a success. This is not possible except by recognizing them more precisely, presenting data and finally employing appropriate strategies to attain the objectives.

There are various methods to analyse different districts in different forms. In this paper, it has been tried to analyze the trend for that by using the logifudinal transversal Isard, the changes in the indexes of development of the cities of Chaharmahal va Bakhtiari province by comparing them to each other as well as Isfahan in one statistical decade (65-75) by considering 24 important indexes.

Keywords: Development Indexes, Chaharmahal va Bakhtiari Province, Regional planning, Development, Isard
