**Department of Geography, University of Yazd

Abstract

The rural community like other communities has some certain requirements which differ in each situation regarding the amount, scale, and quality of influence. "What are the requirements of Yazd's rural society? Which of them has priority?" These are the questions addressed in this survey study. The data are gathered through a questionnaire. Statistic community of the research consists of 4010 rural women who took part in Jihad educational-promotional classes

/...

in 2003. Using Kokran sampling formula, 394 of them were detected as sample content, and using sampling methods (2 steps) of categorized and simple random, samples were chosen. The results show that for Yazd's villagers, the following are the among the priorities: hygienic-remedial education, intermediate education, therapeutic center, pharmacy, ambulance, garbage collecting service, cooperatives, domicile loan, pathways repair, job creation, wage increase, water piping, and gas delivery, among others. Meanwhile, those whose needs have been addressed describe some of the requirements as being exclusively rural needs. Moreover, rural requirements in different rural area of Yazd province are slightly different from each other.

Keywords: Needs and priorities, Needs assessment, Planning, Rural planning, Rural community, Yazd Province
