Archive of SID

1. Livaditis G J . A chemical etching system for creating micromechanical retention in resin- bonded retainers. *J Prosthet Dent* 1986;56:181-8.
2. Zidan O. Etched base metal alloys. Comparison of relief pattern-bond strength and fracture modes. *Dent Mater* 1985;1:209-13.
3. Dilorenzo S C, Duke S. Influence of laboratory variables on the resin bond strength of an etched chrome – cobalt alloy. *J Prosthet Dent* 1986;55: 27-9.
4. Sedberry D, Burgess J. Evaluation of chemical systems for a base metal alloys. *J Prosthet Dent* 1992;68:606-10.
5. Aquillino S A, Dias AAM. Tensile bond strength of electrolytically and chemically etched base metals. *Int J Prosthodont* 1990;3:93-7.
6. Love LP, Breitman J B. Resin retention by immersion etched alloy. *J Prosthet Dent* 1985;53:623-4.
7. Sloom K M, Lovery RE. Evaluation of laboratory etching of cast metal resin bonded retainers. *J Dent Res* 1983;63:(Abs 220)
8. El-Sherif MH. Shillingburg HT. Comparison of the bond strength of resin- bonded retainers using two metal etching techniques. *Quintessence Int.* 1989;20: 385-8.
9. Ferrari M, Cagidiaco MC. Evaluation of chemical solution for nickel chromium beryllium and chromium – cobalt alloys. *J Prosthet Dent* 1989;62:516-21.
10. Conceicao EN , de Goes MF. Chemical etching solution for creating micromechanical retention in resin bonded retainers. *J Prosthet Dent* 1991;65:782-6.
11. Doukouakis A, Tzorotj Opoulou E. A comparison of the shear strength of chemically versus electrolytically . *J Prosthet Dent* 1992;67:674-6.
12. Adhesive metal
14. Bertolotti RL, Napolitano LJ. Bonding Isosit to electrolytically etched nickel chromium substrate. *J Dent Res* 1983;62:(Abs 460).
15. Creugers N H J, Kanter R J A M. Long term survival data from a clinical trial on resin bonded bridges. *J Dent* 1997;25:239-42.
16. Saunders WP. The influence of impact and fatigue force upon the retention of resin. Retained bridge work to etched tooth enamel PhD thesis. University of Dundee.
17. Pegararo LF, Barrack G. Comparison of bond strength of adhesive cast restorations using different designs, bonding agents and luting resin. *J Prosthet Dent* 1987;57:133-8.
18. Williams VD, Arnold AD. Bond versus rebond strength of three luting agents for resin bonded fixed partial denture. *J Prosthet Dent* 1992;67:289-92.
19. Yu XY, Xu JW. The tensile bond strength of various composite resins to alloy . *Quintessence Int* 1987;18:745-7.
20. Lovey DE, Aksee MN. Bonding etched metal with porcelain dual cure resins. *J Dent Res* 1990; 69:(Abst 1939).
21. Kolodney H, Puckett AD. Shear bond strength of prosthodontic adhesive systems to a nickel- chromium beryllium alloy. *Quintessence Int* 1992;23:65-9.
22. Aboush YE, Jenkins CBC. Resin bonded bridge. Chairside method of cleaning metal surface contaminated with saliva. *Br Dent J* 1987;163:227-30.
23. Covington JS , McBride MA. Electrical and physical etching to enhance retention of cast prostheses. *J Dent Res* 1991; 70:(Abs 744)
24. Tanaka T, Afsute M . Surface treatment of gold alloy for adhesion. *J Prosthet Dent* 1988;60:271-82.
